Education

University of South Carolina, Molinaroli College of Engineering and Computing – Columbia, SC **May 2028**
Bachelor of Science in Computer Science | Minor in Business Administration | Concentration in Artificial Intelligence | GPA: 3.9
Honors and Awards: Capstone Scholar, President's List x2, Superlative Scholarship, John H. Fain Computing Scholarship, The Henry R. Lucenius, Tau '77 Scholarship Fund

Skills & Certifications

Programming Languages: Java, Python, JavaScript, TypeScript, SQL, HTML, CSS
Frameworks & Tools: Next.js, React, Supabase, pandas, Streamlit, Git, Linux
Technologies: REST APIs, Oracle SQL, Microsoft Suite (Excel, PowerPoint, Word)
Certifications: CompTIA Network+ (In-Progress), CompTIA Security+ (In-Progress)
Languages: English, Spanish

Professional Experience

University of South Carolina – Division of Information Technology – Columbia, SC **Aug 2026 – Present**
AI Support Specialist, AI Support Center

- Advise UofSC students, faculty, and staff on AI tools, translating capabilities and best practices into clear, practical guidance
- Build software tools and workflow automations, with and without AI, for departments across campus during non-support hours
- Support the center's expansion, including sponsorships and collaborations with leading AI companies and DoIT's educational partnership with OpenAI

Bunch Interests – West Columbia, SC **Sep 2026 – Present**
AI Solutions Intern

- Building an AI estimating tool for Lafaye Homes that turns first-meeting transcripts and survey answers into a preliminary budget range, so reps can price custom homes in minutes instead of days
- Developing a Python/LLM pipeline that converts Wispr Flow meeting transcripts into a 70+ field project profile across 10 categories, flagging unknowns and AI assumptions for rep review before pricing
- Designing a pandas pricing engine that uses the median cost/sq ft of the most similar past homes plus management-set add-ons, an explainable alternative to a neural network that keeps company data local

Nassau BOCES – Garden City, NY **Jan 2023 – Jan 2024**
Financial & Information Systems Intern

- Cleaned and validated employee records in Oracle SQL to support a payroll-platform migration covering 1,000+ employees
- Automated recurring data queries and processes with SQL and Linux scripting for the Financial & Information Systems department

Technical Projects

Setlist | Full-Stack Web Application

- Built and launched Setlist, a social music diary where users imported albums from Spotify, rated songs, and followed friends' activity; 10+ active users
- Implemented Spotify OAuth, Supabase authentication, server actions, and database migrations in Next.js and TypeScript

Markdown-to-Google-Tasks Importer | Workflow Automation

- Built a Python automation tool that parses structured Markdown task lists and creates corresponding tasks through the Google Tasks API
- Structured the code into modular parser, API, and auth layers with dry-run and safe modes, backed by 55 automated tests

AI-Assisted Syllabus Task Import | Workflow Automation

- Designed a workflow that uses AI to extract course deadlines from syllabus documents into structured CSV data
- Used Google Sheets and Google Apps Script to import the extracted deadlines into Google Tasks, turning a repetitive manual setup process into a reusable system

ChatGPT Context Extractor | AI Workflow Design

- Built an AI workflow that turns ChatGPT conversations into standardized Markdown notes of decisions, open questions, and next steps
