516-502-5877 | christyt1806@gmail.com | <https://ctytone.github.io/> | <https://www.linkedin.com/in/christopher-tytone/>

## Education

**University of South Carolina, Molinaroli College of Engineering and Computing – Columbia, SC** **May 2028**

Bachelor of Science in Computer Science | Minor in Business Administration | Concentration in Artificial Intelligence | GPA: 3.9

**Relevant Coursework:** Data Structures & Algorithms, Software Engineering, Computer Architecture

**Honors and Awards:** Capstone Scholar, President's List x2, Superlative Scholarship, John H. Fain Computing Scholarship

## Skills & Certifications

**Programming Languages:** Java, Python, JavaScript, TypeScript, SQL, HTML/CSS

**Frameworks & Tools:** Next.js, React, Supabase, Git, Linux, Vite

**Technologies:** Spotify API, REST APIs, Oracle SQL, Microsoft Suite (Excel, Word, Access, PowerPoint)

**Certifications:** CompTIA Network+ (In-Progress), CompTIA Security+ (In-Progress)

**Languages:** English, Spanish

## Technical Projects

### Setlist | Full-Stack Web Application

- Built a Next.js + TypeScript web app integrating Spotify OAuth and Supabase for authentication, rating storage, and real-time album analytics
- Implemented secure server actions, API routes, and Supabase migrations to support scalable real-time album rating aggregation and analytics workflows

### Markdown-to-Google-Tasks Importer | Workflow Automation

- Built a Python automation tool that parses structured Markdown task lists and creates corresponding tasks through the Google Tasks API
- Integrated API-based task creation into an Obsidian and Google Tasks productivity workflow, reducing repetitive manual entry during project planning

### AI-Assisted Syllabus Task Import | Workflow Automation

- Designed a workflow that uses AI to extract course deadlines from syllabus documents into structured CSV data
- Used Google Sheets and Google Apps Script to import the extracted deadlines into Google Tasks, turning a repetitive manual setup process into a reusable system

### ChatGPT Context Extractor | AI Workflow Design

- Designed a reusable prompt workflow that extracts key decisions, preferences, open questions, and next steps from ChatGPT conversations into organized Markdown context files
- Created a consistent structure that makes past conversation knowledge easier to reuse in later planning and project work

## Professional Experience

**University of South Carolina – Division of Information Technology – Columbia, SC**

**Aug 2026 – Present**

*AI Support Specialist, AI Support Center*

- Provide support for AI-related questions, translating tool capabilities and best practices into clear, practical guidance for UofSC students and staff

**Nassau BOCES – Garden City, NY**

**Jan 2023 – Jan 2024**

*Financial & Information Systems Intern*

- Collaborated directly with the Senior Manager of the Financial and Information Systems Department on data and systems-related projects
- Worked with Oracle databases and SQL to manage large datasets and automate queries, improving efficiency
- Wrote assisted code to efficiently handle data from a database of 1,000+ employees

## Job Experience

**University of South Carolina – Barnes & Noble's Bookstore – Columbia, SC**

**August 2025 – Present**

*Campus Store Team Member*

- Delivered customer support and fulfilled high-volume bookstore and warehouse operations in a fast-paced campus retail environment
